Grayson Boyer

gmboyer@asu.edu | 480.848.1504

PhD candidate with a quantitative biogeochemistry background
seeks career in industry data science.

EDUCATION

ARIZONA STATE UNIVERSITY
PhD in Biochemistry
Expected Apr 2018 | Tempe, AZ
Cum. GPA: 4.0

WASHINGTON STATE UNIV.
BS in Biochemistry
May 2010 | Pullman, WA
Summa cum laude

SKILLS

DATA
Confidence intervals • Decision trees • Detrended correspondence analysis • K-means and hierarchical clustering • Discriminant analysis • Monte Carlo simulations • Nonmetric multidimensional scaling • Principal component analysis • Regex • Regression • Text mining • Visualization

LANGUAGES
R • Python • LaTeX • basic SQL

SOFTWARE
Agilent Masshunter • EQ3/6 • Jupyter Notebooks • Mathematica • Microsoft Excel • SUPCRT92

SELECTED COURSEWORK
Computational Chemistry
Theoretical Geochemistry
Quantitative Biochemistry

RESEARCH AND TEACHING

ENKI PROJECT | Developer and Educator
May 2017 - Present

- Developed three Python and R Jupyter notebooks to automate geochemical data cleanup, calculate properties of water samples with 50+ geochemical variables, and datamine scientifically valuable results from thousands of output files.
- Provided high-level tutorials in the use of free geochemical software tools as a part of an NSF-funded **EN**abling **K**nowledge **I**ntegration (ENKI) initiative.
- Automated complex quality control calculations for environmental water samples, reducing task time from weeks to moments and allowing easy statistical post-analysis of results.

GEOPIG | Research Asst. & Teaching Asst.
Aug 2010 – Expected Apr 2018 | Tempe, AZ

- Performed statistical analyses and visualization of environmental lipid abundance data across 30+ sample sites using a self-curated database of 3,500+ lipid structures.
- Compared observed environmental lipids and concurrent geochemical measurements to generate hypotheses regarding lipid energetic cost and function.
- Led multiple workshops introducing R and the CHNOSZ thermodynamic package to students and faculty (2011-2017).
- Curated and ensured quality control of the SLOP16 open source database containing numerous thermodynamic properties of 2,000+ chemical species.
- Mentored an undergraduate lab research assistant (2013-2014).
- Co-chaired the session "Reaction Kinetics, Thermodynamics, and Habitability" at the Astrobiology Science Conference in Mesa, AZ, on Apr 27, 2017.

GRANTS AND FELLOWSHIPS

- NASA Exobiology | Mar 2016 | $852,865
  "Geochemical and Biomolecular Changes at the Transition to Photosynthesis"
- NASA Astrobiology Institute Grant | Apr 2013 | $10,758
  "How do environmental C:N ratios influence C:N ratios of lipid biomarkers?"
- Arizona State Univ. Grad. Research Fellowship | Aug 2010 | $19,000

PUBLICATIONS
